Load Control

Members Saving Themselves Money for Over 25 Years

Load control is a well-established program that your cooperative put in place more than two decades ago as a way for members to control a portion of our energy costs and save money for all members. At times of high electrical use, power costs are also at their highest. During these times, we are left with two options:

Option 1 – Buy really expensive power to meet the demand, costing members more.

Option 2 – Reduce demand using load control, saving members money.

Help us grow Option 2 and you can reduce the power costs for the whole Cooperative!

How do you get involved? All you need is an electric water heater or central air conditioner or both. Simply let us know you want to participate and we take care of the rest. **There is no cost to you for joining.**

Last year participating members saved the entire cooperative around \$100,000. Help them increase that amount. Besides the overall cost savings, participants earn a **\$2.00 monthly bill credit** for each month their water heater can be controlled and **\$5.00 a month in June, July and August** for their central air conditioner.

Sign up today and make a difference for your power bill!

Contact us at **973.875.5101**, go online at www.sussexrec.com then click on **Load Control** in the Quick Links menu or fill out this form below and mail it, fax it in, or email it. We'll do the rest.

Name: _____

Telephone _____
(to schedule installation)

Address: _____

City: _____ State: _____ Zip: _____

Enroll my electric water heater _____ Gallons

Enroll my central air conditioner _____ Tons

By signing this form, I consent to the terms and conditions of the Sussex REC Load Control Program.

Load Control – Members Saving Members Money

Load Control – Members Saving Members Money

Consent to Install Load Management Device

I CONSENT and agree to have a Demand Response Unit (DRU) installed to control my electric appliances and equipment as noted on the other side of this form and confirmed by my signature thereon for the purpose of reducing the kilowatt demand of the Cooperative during system peak situations.

I UNDERSTAND that there will be no charge to me for the equipment, its installation or removal (except as noted herein) and that the equipment shall remain the property of Allegheny Electric Cooperative, Inc.

I AGREE to permit Sussex Rural Electric Cooperative (SREC) employees and its contractors to enter my premises at reasonable hours and with prior notice to install the DRU, to conduct maintenance and to replace or remove the DRU as necessary. I will also allow SREC employees and its contractors to fix, within reason, electrical code violations that impede the installation of the DRU.

I ALSO HAVE THE RIGHT to request the removal of said DRU equipment, if I so desire. With the following conditions pending: I understand that once the DRU has been installed and is verified as operational, I will receive any rebates being offered by SREC as part of this program. It is also noted that upon receiving any and all rebates that the DRU must remain in place for two (2) years or my account will be charged for the removal of said DRU and a prorated portion of any incentive other than the monthly bill credit. I further understand that SREC may, at its option, elect to leave the DRU installed but remove it from the control program in software.

I UNDERSTAND that the equipment noted on the other side of this form will be controlled in a diligent and reasonable manner as necessitated by load curtailment requests upon SREC by its suppliers and as necessary to insure the proper functioning of the DRU system.

I UNDERSTAND that any tampering with or disconnection of the DRU device will result in its immediate removal with the cost of removal and a prorated share of incentives being charged to my account.
