

# Cummins Onan Residential Generators

## winning accolades in trade press

Cummins Onan Residential Generators have recently been recognized in two leading publications; Builder and Electrical Products and Solutions. The distinguished readers of Builder magazine chose Cummins Onan home standby generators as best in Quality, while the Electrical Products and Solutions staff recognized the engineering focus committed to providing homeowners with the quietest generator in the market. Cummins Onan standby generators are engineered to exacting standards. They are guaranteed to deliver years of reliable and dependable power. But even beyond our products, Cummins is a company that is committed to perform its very best for you.

- Five-year, 2,000-hour warranty
- Cold or warm climate versions
- Meets U.S. EPA and CARB

### Cummins Onan Residential Standby Generator Quietest of Four Brands at All Load Levels

The Cummins Onan RS20A/AC residential generator was quieter at every load in a side-by-side sound comparison with similar-size Kohler, Briggs & Stratton and Generac generators. The rigorous test procedures were certified by SGS Testing (<http://www.sgs.com>), the world's leading inspection, verification, testing and certifying company.

The Cummins Onan RS20 generator runs on either natural gas or LP and includes:

- Patented all climate enclosure
- Durable installation pad so no concrete slab required
- Easy maintenance access
- In-home display
- Email notification
- Remote monitoring via the internet

## Why More Consumers Are Noticing The Quiet Cummins Onan Residential Standby Generator

Who wants a generator that's as loud as a lawn mower right outside their bedroom window? Nobody. That's why the engineers at **Cummins** developed the **Cummins Onan** residential standby air-cooled generator. It delivers dependable standby power on demand without driving the inhabitants crazy with noise.

Unlike traditional home standby generators that draw air from side vents and suffer from debris buildup and snow accumulation, **Cummins Onan** air-cooled residential generators use a patented lid that increases air flow while reducing noise.

A side-by-side sound comparison with similar Kohler, Briggs & Stratton and Generac generators prove that **Cummins Onan** RS20A/AC residential generators are quieter at every load.

In fact, SGS Testing (<http://www.sgs.com>), the world's leading inspection, verification, testing and certifying company certified rigorous test procedures to confirm **Cummins Onan** RS20A/AC residential generators as the quietest generator in their class.

**Cummins Onan** air cooled natural gas or LP fueled generators include:

- Email notification
- Remote monitoring via the internet
- Patented all climate enclosure
- Durable installation pad—no concrete slab required
- Easy maintenance access
- In-home display
- Five-year, 2,000-hour warranty
- Cold or warm climate versions
- U.S. EPA and CARB
- Models from 10kW to 100kW
